Work experience

PHP Developer
Professionali.ru - a huge Russian social network for people in professional occupations (like LinkedIn)
August 2012 - present. Moscow
I`m developing high load back-end in team of 16 developers. I`m responsible for network`s API, some of the network`s apps, creating and supporting different sections of network features, and testing and refactoring parts of core. I had covered the most important parts of core with Unit tests(PHPUnit).
PHP + Mysql + Nginx

Leading Developer
Destiny Devopment - A GameDev company that specializes on Browser games
Septeber 2011 - August 2012. Moscow
I was a leading developer on a browser game. I created whole project structure and developed most important parts of game logic. I was using MySql + HandlerSocket to improve query speed. I also took a great part in discussing and inventing game design.
PHP + Mysql + Nginx

Leading Specialist (PHP)
PROGNOZ - A huge company that fills orders for government and banking
August 2010 - September 2011. Moscow
I created and supported ERP-like systems for

Interests

Web development
Game development
Snowboarding
Reading
Traveling
Bicycling

My social networks pages

Vkontakte
Facebook
LinkedIn
Github
Google+

Ministry of Health. Those are analytic systems with a lot of complicated queries and . And also some of them are OLAP-based.
PHP + Oracle + IIS

PHP Developer

M7 Software - A little company based on creating internet-shops and personal websites for clients
January 2009 - May 2010.(not full time job)
Moscow
I created sites based on company`s framework
PHP + MySql + Apache

Personal Projects

Robot Rock

Novemder 2010 - June 2011.

My first Php + Canvas game. Main purpose was to learn Canvas and increase my PHP skills
